

Yash Doctor

Software Developer

Authorized to work in USA as Permanent Resident. I am looking for an opportunity that challenges my skills in software development. I am able to work in a Fast-Paced environment and have excellent time management, multi-tasking, and communication skills.

EDUCATION

Gujarat Technological University, India — B.E.

June 2018 – April 2022

CGPA – 8.54/10

Enrolled in the Bachelors of Engineering program and majors in Information Technology.

EXPERIENCE

BrainyBeam Technologies, Remote — Software Developer

May 2021 - June 2021

Internship

Developed an android project which focuses on online food ordering and delivery to the customer. I also gain knowledge of Flutter through this Internship.

ACADEMIC PROJECTS

Record Management – Web Application

12/2021 – 02/2022

This Website is built in .NET Core 6. Model, view, controller pattern is used for the development of this website. Controller is written in C# programming language and SQL Server database is used for storing of data. Admin and User can access this website with valid credentials. jQuery is used for user-side validation.

Number Guessing Game – Python Project

11/2021

This is a number guessing game in this the user is asked the interval of the numbers the computer should choose one number. Then the user is asked to guess the number if the number is below the guess number then the computer informs the same and same for the large number. The number of trials is dependent upon the length of the interval.

Attendance Manager – Android Application Project

09/2021 – 11/2021

This project is Android Application. This application was developed for faculty members of my college to overcome the issue of maintaining attendance sheets. The storage in the application was done through SQLite database and creating a dynamic list with RecyclerView.
